MAY 2021 – MARCH 2022

Bhavan's College

69%

PROJECTS

1) Train Ticket Reservation System

- This project is about the Train-Ticket-Reservation-System, which is used to view Train schedules, search trains, Seat availability, and Train timings.
- We can also enquire about the fares of different trains. We can get information about the train between two stations. This provides a safe and secure seat reservation system.
- **Technologies:** Java, JDBC, HTML, CSS.
- [Github link](#)

2) Student Login Web App

- Built a Web App where student credentials and personal data can be saved and used for further work in College and School.
- This web app was created from the perspective of an IoT project. When a student scans his ID then through the barcode is then fetched into the database. There is a Security option for data breach and loss
- **Technologies:** PHP, HTML, CSS, JavaScript.
- [Github Link](#)

3) SlotEventure

- This is an Events Booking Web App designed to connect an event organizer with attendees.
- Users can browse and search for a wide variety of events, concerts, conferences, workshops, and many more.
- This Platform offers a redeemable system where users earn points and rewards based on the reviews and buying events
- **Technologies:** React.js, Next.js, MongoDB
